DATE MAILED: 03/26/2003

**Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)**  
(application filed on or after May 29, 2000)

The patent term adjustment to date is 0 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 0 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

**Notice of Fee Increase on January 1, 2003**

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

The following is an examiner's statement of reasons for allowance: Robinson et al. (US 5050272) (figure 1) teaches a molded clip comprising an upper jaw and a lower jaw generally coextensive therewith, each jaw having a forward end and a rearward end axially opposed thereto; hinge means interconnecting the rearward ends to permit the jaws to rotate between a closed position in which the jaws are in mutually confronting relationship and an open position; a cooperating latch element disposed at the forward end of each of the jaws for releasably latching the jaws in the closed position; characterized wherein the hinge means comprises a hinge bearing disposed at the rearward end of the jaws, the hinge bearing comprising a single rearwardly extending lower bearing portion adjacent the lead line for reference numeral 62 and a downwardly extending upper bearing portion 61, mutually confronting surfaces of the portions together defining a transversely extending gudgeon opening and a downwardly open throat of restricted diameter in comparison to that of the gudgeon opening communicating with the passage and the gudgeon opening; the hinge means further comprising a pivot pin 27, the hinge element and the throat being dimensioned to permit the passage of the pivot pin 27 therethrough under the influence of a biasing force. The differences are that there is a single rearwardly extending lower bearing portion not a pair of laterally spaced apart, rearwardly extending lower bearing portions to define a passage therebetween; the upper bearing portion extends downwardly and not in a rearwardly disposed superior, spaced apart relation to a pair of rearwardly extending lower portions; and the hinge element in the other jaw is a pivot pin not a tab extending rearwardly from the rearward end of the lower of the jaws with a hinge

element receivable in the gudgeon opening for rotation therein. There is no suggestion in the art of record to modify the device of Robinson et al. to provide these differences.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

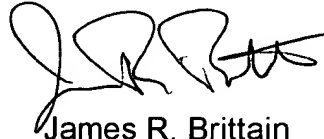

The minor amendments to pages 7, 8, and 9 of the specification submitted in the amendment received February 24, 2003 comprise typographical errors and have been made by informal examiners amendment.
